About the Book

Operating System Concepts, now in its ninth edition, continues to provide a solid theoretical foundation for understanding operating systems. This ninth edition has been thoroughly updated to include contemporary examples of how operating system function.

New to the Ninth Edition:

Increased coverage of multicore systems and parallel programming;
 New coverage of mobile systems including IOS and Android;
 Updated coverage of Memory;
 New chapters on virtual machines and Windows 7;
 Integrated coverage of Linus and Windows throughout.

Table of Contents

Part One Overview

Chapter 1 Introduction
 Chapter 2 System Structures

Part Two Process Management

Chapter 3 Process Concept
 Chapter 4 Multithreaded Programming
 Chapter 5 Process Scheduling
 Chapter 6 Synchronization
 Chapter 7 Deadlocks

Part Three Memory Management

Chapter 8 Memory-Management Strategies
 Chapter 9 Virtual-Memory Management

Part Four Storage Management

Chapter 10 File System
 Chapter 11 Implementing File-Systems
 Chapter 12 Mass-Storage Structure
 Chapter 13 I/O Systems

Part Five Protection and Security

Chapter 14 System Protection
 Chapter 15 System Security

Part Six Case Studies

Chapter 16 The Linux System
 Chapter 17 Windows 7

Exercises

Bibliographical Notes

Appendices (Online)

Appendix A BSD UNIX

Appendix B The Mach System

Exercises

Bibliographical Notes

About the Author

Abraham Silberschatz :- **Abraham Silberschatz** is the Sidney J. Weinberg Professor and Chair of Computer Science at Yale University. Prior to joining Yale, he was the Vice President of the Information Sciences Research Center at Bell Laboratories.

Greg Gagne :- **Greg Gagne** is chair of the Computer Science department at Westminster College in Salt Lake City where he has been teaching since 1990.

Peter Baer Galvin :- **Peter Baer Galvin** is the chief technologist for Corporate Technologies (www.cptech.com), a computer facility reseller and integrator. As a consultant and trainer, he has given talks and taught tutorials on security and system administration worldwide.
