

Engineering Mathematics, 1/e

G Shanker Rao

2010	668 pp	Paperback	ISBN: 9788190656603	Price: 375.00
------	--------	-----------	---------------------	---------------

About the Book

Engineering Mathematics (Volume II) is a comprehensive text for the students of engineering.

The topics included are:

Differential equations, Special functions, Laplace transforms, Partial differential equations and applications of partial differential equations.

Salient Features

- ▶ Each topic is treated in a systematic and logical manner.
- ▶ Wide variety of exercises at all levels.
- ▶ Several worked-out examples drawn from various examination papers of reputed universities.

Table of Contents

1. Basic Concepts of Differential Equations
2. First Order and First Degree Differential Equations
3. Differential Equations of First Order but not of First Degree
4. Total Differential Equations
5. Orthogonal Trajectories
6. Higher Order Linear Differential Equations
7. Linear Differential Equations with Constant Coefficients and Applications of Differential Equations
8. Series Solutions of Differential Equations
9. Special Functions
10. Laplace Transforms
11. Partial Differential Equations and Fourier Series
12. Applications of Partial Differential Equations Index

About the Author

G Shanker Rao :- G. Shanker Rao, Member of Staff, College of Engineering, Osmania University, Hyderabad. G. Shanker Rao holds an M.Sc. degree in Mathematics. He has the experience of teaching mathematics to undergraduate and postgraduate students for more than 25 years.
