Bioethics and Biosafety, 1/e
M K Sateesh

About the Book
Biosafety deals with prevention of large scale loss of biological integrity focusing both on ecology and human health. It is related to several fields such as ecology, agriculture, medicine, chemistry and ecobiology.
Bioethics is the philosophical study of the ethical controversies brought about by advances in biology and medicine. It is concerned with the ethical questions that arise in the relationships among life sciences, biotechnology, medicine, politics, law, philosophy and theology. It is concerned with the nature of life and death, the kind of life to be considered worth living, what constitutes murder, how people in very painful circumstances should be treated, what are the responsibilities of one human being to others, and other such living organisms.
The book has been divided in 28 chapters. It is an integrated approach to encompassing information on different aspects of bioethics and biosafety and their applications in biotechnology. Simple, clearly understandable illustrations, correct and up to date information’s are the main features of this book.
The book is intended not only for undergraduate and postgraduate students of biotechnology, genomics and related sciences, but is also aimed to draw attention of policy makers and teachers at national and international levels to the possible approaches in the field of biotechnology.

Salient Features
- Covers the topics in depth from basic and deals with the key subject areas.
- Takes a broader view of the earlier and current situation indifferent countries.
- Gives the uses and their ethical aspects of the different technological developments made in the biotechnology fields.
- Covers new developments in wider areas of biotechnology and its applications to mankind.
- Deals with aspects of the Bioethics and Biosafety protocols and their implements.
- Briefs the Indian Biodiversity Act.

Table of Contents
1. Introduction to Bioethics and Biosafety
2. Human Genome Project and its Ethical Issues
3. Molecular Detection of Pre-Symptomatic Genetic Diseases and its Importance in Healthcare
4. Prenatal Diagnosis, Genetic Manipulations and their Ethical Issues
5. Ethical, Legal and Social Implications of Human Genome Project
6. Genetics Studies on Ethnic Races
7. Biosafety Guidelines and Regulations
8. Legal and Socio-economic Impacts of Biotechnology
10. Hazardous Materials used in Biotechnology—their Handling and Disposal
11. Good Laboratory Practice (GLP) and Good Manufacturing Practice (GMP)
12. Public Education of Producing Transgenic Organisms
13. Intellectual Property Rights and Agricultural Technology, and their Implications for India and other Developing Countries
15. Introduction to Patent and Process Involved in Patenting
16. Patenting Living Organisms
17. Traditional Knowledge, Commercial Exploitation, and Protection
18. Bioethics in Biodiversity and Resource Management
About the Author

M K Sateesh: M.K. Sateesh, Faculty, Department of Bio-Technology, Bangalore University, Bangalore, India.
