

Bioseparation Engineering: A Comprehensive DSP Volumen, 1/e

Ajay Kumar & Abhishek Awasthi

2009 224 pp Paperback ISBN: 9789380026084 Price: 345.00

About the Book

Bioseparation Engineering is meant for undergraduate and the postgraduate student community pursuing careers in Life Sciences. It concentrates on the more recent methods and techniques for separating components and products of the biotechnology industry. Each chapter deals with a specific type or area of application and includes information on the basic principles, industrial equipment available, commercial applications and an overview of current research and development. Main objective of the book is to provide in-depth knowledge of the subject in an interesting and paramount simple way

Salient Features

Covers the techniques of bioseperation, providing details of physical, chemical and biological principles involved. Gives an end-to-end treatment of the downstream processing (DSP) segment of biotechnology. Profusely illustrated with diagrams and uses a simple easy-to-understand language.

Table of Contents

- ▶Bioseparation Engineering: An Overview
- ▶ Cell Disruption
- ▶ Filtration
- ▶ Centrifugation
- ▶ Product Isolation
- ▶ Precipitation
- ▶ Chromatography
- ▶ Electrophoresis
- ▶ Membrane Separations
- Drying
- ▶ Crystallization
- ▶ Finished Good Formulation and Packaging
- ▶ Index

About the Author

Ajay Kumar: - Ajay Kumar, Senior Lecture, Department of Biotechnology, Institute of Biomedical Education Research, Mangalayatam University, Aligarh, UP, India.

Abhishek Awasthi: - Abhishek Awasthi, Department of Science, Technology & Engineering, La Trobe University, Melbourne, Victoria, Australia.
