Emerging Trends in Biomedical Science and Health, 1/e
D.V. Rai, R.C. Sobti & Raj Bahadur

About the Book
Biomedical Sciences is an important discipline with an explosion of information and application in various disciplines of science, engineering and medicine. The revolution in biological and medical sciences has impacted academicians, scientists and industrialists alike. As a result, there is a change in the curriculum in biomedical sciences and several modern, present and future modalities have been introduced.

The present book is designed to make the reader familiar with the basic aspects that affect the human health. It also covers the basic and applied aspects in the field. It also includes various aspects on the application of biomedical sciences and potential risks and benefits in terms of growing knowledge in the field of biomedical sciences and technology, stem cell in biomedicine, microorganisms and health, bioaerosols and bioengineered food. Moreover, it highlights on promoting the healthy technology for future safeguard to human life.

It will cater to the graduate and post-graduate students of biomedical sciences, environmental biotechnology, medical physics, B.E. and B.Tech. (Biomedical Engineering)

Salient Features
Salient Features:

- Deals with the lifestyle related to health diseases, human rhythms in toxicology, cancer prevention, etc.
- A compilation of 15 chapters, each chapter begins with an introductory note and ends with a conclusion.

Table of Contents

- Foreword
- Preface
- Contributors
- Oxidative Stress in Health and Diseases
- Biological Rhythms in Pharmacology and Toxicology
- Bone Physiology in Health and Disease
- Targeting Carcinogen Biotransformation: An Emerging Cancer Control Strategy
- Epilepsy: Herbal Remedies
- Immunotoxicology and Health
- Stem Cells: New Perspectives in Biomedicine
- Microbes and Human Health
- Shilajit: Health Rejuvenant
- Vitamins and Minerals: Health Prospects
- Genetically Engineered Foods and Health
- Bioaerosol: Impact on Human Health
- Energy Sources: Health Effects
- Medical Geology
- Biomedical Geography: Disabled Population
- Index

About the Author

Raj Bahadur - Raj Bahadur M.Sc. Orth (BHU) FAMS. His contributions are in the field of orthopedic surgery, medical education, spine surgery, joint replacements, trauma management, orthopedic implants, disaster management and stem cell in bone repair.
