About the Book

In terms of overall orientation, this book has been so conceived and structured that it has followed a certain natural corollary and logical framework in comparing Indian economy with the Asian and the global economy in respect to the sectors wherein India is perceived to play a leadership role—both in the regional and the global context. Secondly, an attempt has also been made to identify areas, where, India, despite possessing a huge potential, could not so far convincingly demonstrate its competitive advantage to compete globally. Thirdly, competitive advantages in certain chosen fields, wherein India can excel and outperform its competitors are elaborated and highlighted with broad indication of the future strategy. Last, but not the least, the book has dealt with the various sectoral investment opportunities in India for achieving global competitiveness.
