About the Book

The present treatise spread in 67 contributions from the experts deals with the following topics:

- Information Processing and Pattern Recognition
- Computer Communication Networks
- Hardware and Optimization
- Data Mining
- Software Engineering
- Distributed Systems
- Biomedical Informatics
- Soft Computing

Salient Features

Salient Features:

- Focuses on the tools and techniques for the development of Information Systems, emphasizing on pattern recognition and image processing, software engineering, mobile ad hoc networks, etc.
- It is a compilation of 67 papers on different aspects of information processing.
- More than 200 eminent researchers and academicians have contributed in this book.
- Every article has an abstract, keywords, conclusion and references.

Table of Contents

- Data Mining
- Image Processing and Pattern Recognition
- Software Engineering
- Computer Communication Networks
- Networks System
- Wireless Sensor Networks
- Distribution Systems
- Bio Medical Informatics
- Soft Computing
- Poster Papers
- Index

About the Author

L M Patnaik: - Prof. L.M. Patnaik is the Vice Chancellor of Defence Institute of Advanced Technology, Pune, India. He has been a Professor since 1986 with the Department of Computer Science and Automation, Indian Institute of Science, Bangalore. During the past 35 years of his service at the Institute he has over 600 research publications in referred International Journals and Conference Proceedings. He is a Fellow of all the four leading Science and Engineering Academies in India; Fellow of the IEEE and the Academy of Science for the Developing World. He has received twenty national and international awards; notable among them is the IEEE Technical Achievement Award for his significant contributions to high performance computing and soft computing. His areas of research interest have been Parallel and Distributed Computing, Mobile Computing, CAD for VLSI Circuits, Soft Computing, and Computational Neuroscience.
K R Venugopal - K.R. Venugopal is serving as the Principal and Dean of Engineering at University Visvesvaraya College of Engineering, Bangalore University, Bangalore. He obtained his Bachelor of Engineering from University Visvesvaraya College of Engineering. He received his Masters degree in Computer Science and Automation from Indian Institute of Science, Bangalore. He was awarded Ph.D. in Economics from Bangalore University and Ph.D. in Computer Science from Indian Institute of Technology, Madras. He has a distinguished academic career and has degrees in Electronics, Economics, Law, Business Finance, Public Relations, Communications, Industrial Relations, Computer Science and Journalism. He has authored 23 books on Computer Science and Economics, which include Petrodollar and the World Economy; C Aptitude; Mastering C; Microprocessor Programming; Mastering C++ and others. During his nearly three decades of service at UVCE he has over 175 research papers to his credit. His research interests include Computer Networks, Parallel and Distributed Systems, Digital Signal Processing and Data Mining.
