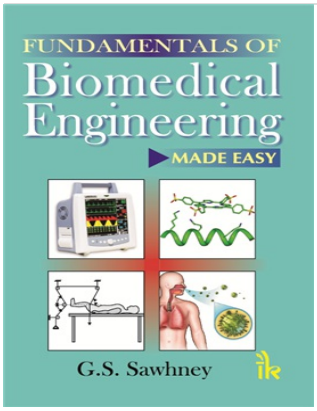
Book Information Sheet



Fundamentals of Biomedical Engineering Made-Easy, 1/e

G.S. Sawhney

2011 | 320 pp | Paperback | ISBN: 9789381141489 | Price: 255.00

About the Book

This book deals with the principles and concepts of Biomedical Engineering in a simple and easy manner. The text is admirably suited to meet the needs of the students of mechanical engineering who opt for the elective Biomedical Engineering. However, coverage of bioinstrumentation, biomaterials and computing for biomedical engineering also meets the needs of electronics and instrumentation engineering students.
Most of the questions have been taken from various university examination papers, specially from UPTU.

Salient Features

- Each chapter gives an introduction on the topic followed by the question-answer treatment of the subject matter.
- Includes a lot of line drawings and figures for better understanding of the text.
- Includes topics like anatomical terms, planes, and movements as well as histology and physiological systems of the body.

Table of Contents

- Anatomical Terms, Planes and Moments
- Histology
- Physiological Systems
- Transducers and Biomedical Instrumentation System
- Bioelectrical Potentials and Electrodes
- Cardiovascular System and Measurement
- Respiratory System
- Diagnostic Techniques
- Biotelemetry
- Patient Care and Monitoring
- Computer in Medicine and Digital Image
- Signal Processing
- Biomechanics of Bones
- Biomechanics of Soft Tissues
- Skeletal Joints
- Mechanics of the Spinal Column
- Mechanics of the Upper Limits
- Mechanics of the Lower Limits
- Metallic Biomaterials
- Polymeric Biomaterials
- Bioceramic Biomaterials
- Composite Biomaterials
- Kidney and Blood Flow
- Index.

About the Author

G.S. Sawhney :- G. S. Sawhney is Professor and Head, Mechanical Engineering Department, AIMT, Greater Noida. Earlier, he was professor and Head at GNIT, Greater Noida and LKCE, Ghaziabad. Prof. G.S. Sawhney obtained his B.Tech degree from I.I.T. Madras and ME degree from Pune University. He has experience of 45 years and authored more than 20 books on various Mechanical Engineering subjects.
