About the Book

Written for the second-year engineering students of undergraduate level, this well set out textbook explains the fundamentals of Fluid Mechanics. Written in question-answer form, the book is precise and easy to understand.

The book presents an exhaustive coverage of the theory, definitions, formulae and examples which are well supported by diagrams (wherever necessary) and problems in order to make the underlying principles more comprehensive.

In the present third edition, the book has been thoroughly revised and enlarged. Modification to every chapter has been carried out on the basis of suggestions received and new developments in this area. Additional typical problems based on the examination papers of various technical universities have been included with solutions for easy understanding by the students.

Objective questions of competitive examinations of GATE, IES and IAS have also been included with solutions and explanations at the end of each chapter.

Table of Contents

1. Fluids: Definitions & Properties
 2. Pressure and Head
 3. Hydrostatic Forces
 4. Buoyancy and Floatation
 5. Fluid Masses Subjected to Acceleration
 6. Dimensional Analysis
 7. Similitude and Model Analysis
 8. Fluid Kinematics
 9. Fluid Dynamics-I
 10. Fluid Dynamics-II
 11. Laminar Flow
 12. Turbulent Flow
 13. Boundary Layer Analysis
 14. Flow Through Pipes and Compressibility Effects
 15. Ideal Fluid Flow
 16. Flow Past Submerged Bodies
- Index

About the Author

G.S. Sawhney :- has served as Professor and Head, Department of Mechanical Engineering, GNIT Greater Noida. Earlier he was at Lord Krishna College of Engineering, Ghaziabad in the same capacity. Prior to joining teaching, he had served for 28 years in the Corps of Engineers and for 10 years in industry. His other books published by I.K. International Pvt. Ltd. are:

Biomedical Electronics and Instrumentation
 Fluid Machinery Made Easy
 Fundamentals of Computer Aided Manufacturing
 Fundamentals of Biomedical Engineering Made Easy
 Heat and Mass Transfer

Manufacturing Science (Volume-I, II)
Materials Science and Engineering
Mechanical Experiments and Workshop Practice
Project Management Made Easy
