

HACCP: Applications and Challenges

Alok Kumar, D. Kumar & R.A. Sharma

2019 168 pp Paperback ISBN: 9789386768414 Price: 295.00

About the Book

Adoption of Hazard Analysis Critical Control Point (HACCP) system for production of safe food is gaining momentum in the food industry. HACCP is a scientific system to identify, monitor, and control contamination risks in food industry.

This book addresses the demands of the hotel industry in the new millennium. Educators who are preparing professionals for roles as food & beverage managers, chefs and general managers in hotels are required to meet the challenges of operations, technology, training, international laws practices and applications. This book will encourage and support researchers to conduct meaningful studies on Food & Hotels which is one of the fastest growing industries in India.

This book will be of interest to a wide readership, to food scientists in industry, in research institutes, and in consultancy, food auditors & HACCP Certification trainers and to government officials and advisors. It is an essential reading for students in hotel management, food science and environmental/home science courses.

Salient Features

comprehensively designed to be handbook for HACCP for its application in food sector.
