About the Book

Advanced Drug Delivery Systems (ADDS) are delivery systems which are based on the principles of novel drug delivery systems and use the latest and most advanced technologies. They are meant to deliver the drug in a controlled or modulated way within the tissue or cells and aimed at safe and effective medication. They help in delivering drug levels in the body by reducing the toxicity and delivering the drug effectively at the desired site of action. The main advantage of ADDS is its versatility and capability to make the drugs more bioavailable. Therapeutic efficacy and safety profile of drugs can be improved by more precise spatial and temporal placement in the body compartment, resulting in reduction in dose frequency.

Divided in eleven chapters, the book broadly deals with:

- advanced drug delivery systems
- preformulation studies
- experimental design
- basic experimental procedures in advanced drug delivery systems
- delivery systems designed for different routes of drug administration

Salient Features

- Caters to the needs of B. Pharm. Final year & M. Pharm. Pharmaceutical/industrial pharmacy
- Conforms to the new syllabus prescribed
- Facilitates practical understanding of novel drug delivery system
- Covers basic, practical and theoretical aspects pertaining to major routes of drug delivery
- Practicals covered in the book can be carried out with minimum facilities
- Supplementary information has been provided in the form of appendices

Table of Contents

1. Advanced Drug Delivery Systems
 2. Preformulation Studies: An Essential Tool for Formulation Development
 3. Experimental Design
 4. Basic Experimental Procedures in Advance Drug Delivery Systems
 5. Oral Drug Delivery
 6. Buccal Drug Delivery
 7. Transdermal Drug Delivery
 8. Ophthalmic Drug Delivery
 9. Nasal Drug Delivery
 10. Vaginal Drug Delivery
 11. Miscellaneous
- Appendix
Abbreviations
Index

About the Author

Sheefali Mahant :- is a postgraduate in pharmacy from Manipal Academy of Higher Education, with eleven years of experience in teaching and research. She is currently pursuing her doctoral studies as UGC-BSR fellow from the department of Pharmaceutical Sciences, Maharishi Dayanand University, Rohtak.

Rekha Rao :- is M. Pharm & PhD from Maharishi Dayanand University, Rohtak. She has thirteen years of teaching and research experience. She is Assistant Professor, Department of Pharmaceutical Sciences, Guru Jambheshwar University of Science & Technology, Hisar.

Sanju Nanda :- is a postgraduate from Department of Pharmaceutical Sciences from H.S. Gaur Vishwavidyalaya, Sagar, Madhya Pradesh. She is PhD from IIT Delhi and LLB from Maharishi Dayanand University, Rohtak. Her experience spans twenty-four years. She is Professor, Department of Pharmaceutical Sciences, Maharishi Dayanand University, Rohtak.
